THE LIBRARY

OF THE

SURGEON-GENERAL'S OFFICE,

UNITED STATES ARMY.

AUTHORS AND SUBJECTS.

VOL. XVI.

W—ZYTHUS.

WASHINGTON:
GOVERNMENT PRINTING OFFICE.
1895.

WAR DEPARTMENT, SURGEON-GENERAL'S OFFICE,
MEDICAL MUSEUM AND LIBRARY DIVISION,
Washington, D. C., June 1, 1895.

General GEORGE M. STERNBERG,
Surgeon-General, U. S. Army.

GENERAL: I have the honor to present herewith the sixteenth volume of the Index-Catalogue of the Library of this Office.

This volume includes 12,759 author-titles, representing 4,857 volumes and 11,613 pamphlets. It also contains 8,312 subject-titles of separate books and pamphlets and 13,280 titles of articles in periodicals.

The following table shows the number of titles in the Index-Catalogue, as far as published:

Volumes.	AUTHOR-TITLES.			SUBJECT-TITLES.		Portraits.

This volume completes the alphabet, and is therefore the final volume of the first series of the Index-Catalogue. The manuscript of a second series, including all the titles of books and articles received too late for insertion in the first series, has been prepared, and will probably make five printed volumes of the same size and style as those constituting the first series. The appropriation for printing Volume I of this second series has been granted by Congress, and the work will therefore proceed without interruption, the manuscript for the first volume being now nearly ready for the press. In presenting this final volume of the first series, I desire to acknowledge, and to return sincere thanks for, the great assistance which has been given by many persons in the collection and cataloguing and indexing of this Library, and in securing the publication of the Index-Catalogue.

As regards the collection of the books and pamphlets which form the Library, and which now includes 116,847 books and 191,598 pamphlets, it is to be observed that practically all of them have been obtained within the last thirty-five years, and that at least one-sixth of them have been presented, either in exchange or as a direct gift to the Library. There are few medical writers now living who have not sent to the

Library at least one pamphlet, hence a complete list of donors would be too long to print in this place, but I append a list of the names and addresses of those persons, institutions, and governments to whom the Library is indebted for numerous and valuable contributions. Among these I desire to especially name the following, as having been remarkably liberal donors, viz:

Sir Henry Acland, of Oxford.
Dr. John T. Arlidge, of Stoke-upon-Trent, England.
Dr. James R. Chadwick, of Boston.
Dr. T. W. Colescott, of Louisville.
Dr. J. M. Da Costa, of Philadelphia.
Dr. Maurice Davis, of London.
Dr. Samuel A. Green, of Boston.
Dr. James C. Hall, of Washington.
Mr. William Hey, of Leeds, England.
Dr. J. Stockton-Hough, of Trenton, N. J.
Dr. A. Jewett, of Dayton, Ohio.
Sir Thomas Longmore, of Southampton, England.
Dr. F. J. Mouat, of London.
Dr. R. S. Newton, of New York.
Dr. P. L. Panum, of Copenhagen.
Dr. J. C. Peters, of New York.
Dr. J. H. Rauch, of Springfield, Ill.
Dr. W. M. H. Sänger, of Groningen.
Dr. J. Shrady, of New York.
Dr. A. R. Thomas, of Philadelphia.
Dr. E. J. Waring, of London.
Dr. J. Collins Warren, of Boston.
Dr. F. von Winckel, of Munich.
Dr. H. C. Wood, of Philadelphia.
Messrs. William Wood & Co., of New York.
Dr. E. A. Anderson, of Wilmington, N. C.
Dr. R. Buckler, of Baltimore.
Dr. Norman Chevers, of London.
Dr. C. A. E. Cornaz, of Neufchâtel.
Dr. J. C. Dalton, of New York.
Dr. John Green, of St. Louis.
Pres. D. C. Gilman, of Baltimore.
Dr. Robert Harvey, of Calcutta
Dr. A. Hirsch, of Berlin.
Dr. A. Jacobi, of New York.
Dr. F. D. Lente, of Cold Springs, N. Y
Dr. B. C. Miller, of Chicago.
Dr. W. H. Mussey, of Cincinnati.
Dr. William Osler, of Baltimore.
Dr. Joseph Parrish, of Burlington, N. J.
Dr. A. E. M. Purdy, of New York.
Dr. A. von Rozsahegyi, of Klausenburg.
Dr. John M. Scudder, of Cincinnati.
Dr. Stephen Smith, of New York.
Dr. Willis G. Tucker, of Albany.
Dr. Edward Warren, of Baltimore.
Dr. J. B. White, of Buffalo.
Mr. Thomas Windsor, of Manchester.
Dr. T. F. Wood, of Wilmington, N. C.
Dr. H. C. Yarrow, of Washington.
New York Medical Journal.

Index Medicus.—All the periodicals sent to this publication in exchange, and all the books sent to it for description in its pages, have been presented to this Library by the editors. In the sixteen years during which the Index Medicus has been published (it is now in its seventeenth year) the quantity of journals and books thus obtained is of considerable magnitude. Many of them are, of course, duplicates, but they serve excellently well for exchange purposes, and some foreign periodicals have been obtained through this channel exclusively.

At the commencement of the work of indexing the files of periodicals in the Library, in 1873, the aid of several medical officers of the Army was asked, and cheerfully granted, and I am indebted to the following officers for such assistance during the years 1874 and 1875, viz: Drs. B. J. D. Irwin, Joseph R. Smith, B. E. Fryer, W. C. Spencer, Dallas Bache, A. A. Woodhull, W. R. Steinmetz, R. H. White, Frank Meacham, D. Weisel, Charles Smart, and A. C. Girard.

At the beginning of the year 1876 a few copies of a "Specimen Fasciculus of a Catalogue" of this Library were printed and distributed to medical libraries and bibliographers to obtain criticisms and suggestions as to the form of catalogue that would be most acceptable and useful. The form shown in that fasciculus was that which has been used in the Index-Catalogue, being a combined index of authors and subjects arranged in dictionary order in a single alphabet. At that time the Library contained about 52,000 books and pamphlets, and it was estimated that the catalogue, completed on the plan of the specimen fasciculus, would make about five volumes of 1,000 pages each. The publication of the specimen fasciculus attracted the attention of the medical profession to the Library, and the accessions to the collection rapidly increased. At this date the Library contains 308,445 books and pamphlets.

Soon after the publication of the specimen fasciculus, Dr. Robert Fletcher was assigned to duty in the Library, and became the principal assistant in the work of preparing and printing the Index-Catalogue. His service in this work has been continuous to this date, and I cannot sufficiently express my sense of its importance and value. The accuracy and typographical excellence of the volumes are largely due to his careful and skilful supervision.

I am also indebted to Dr. Charles Rice, of Bellevue Hospital, New York, to Dr. James R. Chadwick, of Boston, and to Dr. H. C. Yarrow, of Washington, for aid in reading proofs.

I desire also to acknowledge and return thanks for the work which has been done by the clerks of the Library Division, in connection with the Index-Catalogue work, and in particular to express my appreciation of the services which have been rendered by Mr. C. P. Clark, Mr. F. W. Stone, Mr. Edward Shaw, Mr. F. L. Apel, Mr. H. O. Hall, and Mr. W. T. W. Moritz, which have gone far beyond mere routine clerical duty.

I also consider it to be a duty to call attention to the manner in which the printing of the work has been carried on under the direction of Capt. H. T. Brian, of the Government Printing Office, and to return thanks for this, as well as for the aid of the skilled proof readers, Mr. H. N. Boernstein and his assistants, who have had charge of this part of the work.

The errors in the Catalogue are mainly errors of omission under subjects, that is, failure to catalogue under a subject books or papers on that subject which were in the Library. But there are also many errors of commission, as will be seen by the table of *Corrigenda* at the end of this volume, which table is limited to such errors, leaving those of omission, so far as known, to be supplied in the subject lists in the new series. The only consolation which I have with regard to these errors is that they appear to be less in number and importance in the later volumes than they were in the first.

This is probably the last volume of the Index-Catalogue which will be issued under my personal supervision, and, in closing the work, I can only say that it has been to me a "labor of love," and that I am very thankful that I have been allowed to complete it, so far as the first series is concerned.

Very respectfully,

Your obedient servant,

JOHN S. BILLINGS,

Deputy Surgeon-General, and Lieut. Col. U. S. Army.

Very fit to be bound up with the doctor's book. 2. ed., with a postscript, containing a few merry reflections on a late bombastick pamphlet in defence of the doctor's book, wrote by one Tom Taylor, the first born of all the sons of stupidity, and bull-rider to the Bear-Garden. 8°. *London*, 1723.
